

Sovereign AI Platform for a Central European Private Equity Fund

Industry	Financial Services (Investment Management)	Headquarters	Austria
Operating Region	Austria, Germany, Switzerland, Czech Republic, and Hungary	Regulatory Context	GDPR · EU AI Act · Sector-specific EU Directives

Business Challenge

A Vienna-based private equity fund, called 'Stratton Europe Capital' with €18 billion AUM managing 34 portfolio companies across Central Europe faces:

- Due diligence processes requiring 12 weeks and consuming 60% of deal team capacity
- Portfolio company performance monitoring relying on quarterly manual reporting with no real-time signals
- ESG reporting obligations under EU SFDR requiring data from 34 portfolio companies in inconsistent formats
- Deal sourcing dependent on personal networks with no systematic market intelligence capability
- Regulatory reporting for Luxembourg-based fund vehicles requiring AIFMD compliance documentation

Transformation Objective

Deploy a sovereign investment intelligence platform that accelerates due diligence, enables real-time portfolio monitoring, automates ESG reporting, and enhances deal sourcing through AI-driven market intelligence.

- Current solution is a legacy on prem.
- Solution must land in the Azure Sovereign Landing zone
- Solution must be heavily infused with AI to continuously improve the outcome, to enable grow and new services of

Azure Services

▸ Azure OpenAI ▸ Microsoft Fabric ▸ Microsoft Purview ▸ Power BI ▸ Dynamics 365	▸ Azure Machine Learning ▸ Azure Synapse Analytics ▸ Azure Confidential Computing ▸ Azure API Management ▸
---	--

Expected Outcomes

- Due diligence cycle reduced from 12 weeks to 3 weeks, SFDR reporting fully automated, deal sourcing pipeline increased by 40%, portfolio company financial anomalies detected in real time.
- A new Azure environment based on Azure Sovereignty Landing zone
- Evidential proof (mocked) from the above improvements

AI Infusion Point

A GenAI due diligence engine analyses financial statements, legal documents, and market data to produce structured risk assessments. An ESG data extraction AI standardises portfolio company sustainability metrics from unstructured reports. A deal intelligence copilot monitors M&A signals, patent filings, and regulatory announcements to surface investment opportunities.

This must be a center piece so that Stratton Europe Capital becomes an Frontier AI driven company.
